

# MQ2 Gas Sensor

The MQ2 Gas Sensor can detect all kinds of gases in the air, such as smoke, liquefied gas, butane, propane, methane, alcohol, hydrogen, and others.

## Real-Life Examples

- Smoke alarms detect smoke and other flammable gases in the environment.

## Parameters

- Size: 24x36mm
- Operating current: 160mA
- Heating impedance: 33 $\Omega$
- Pre-heat energy consumption: < 800mW

## Notes

5-minute pre-heat for better performance.
