

# PIR Sensor

The Passive Infrared (PIR) sensor detects motion from humans or warm-blooded animals.

## Real-Life Examples

- The automatic door of shopping malls uses PIR sensor in the opening or closing door

## Parameters

- Size: 24x20mm
- Detecting range: 3~5m
- Detecting angle of the X axis: 80°
- Detecting angle of the Y axis: 55°
- Duration after triggering: 3s
- Operating current: 15mA
