2023

Welcome!

Dear educator,

At Vernier, educators are at the heart of everything we do. Many of us are former educators—and all of us are dedicated to supporting current educators. That support starts with understanding the unique challenges educators face today, such as helping students catch up on unfinished learning caused by the COVID-19 pandemic and seeing many colleagues recently retire from teaching.

We also care deeply about education, which is why we are dedicated to setting educators up for success and giving them the tools they need to engage students through hands-on, socially relevant science education. For example

- We provide educators with one hour of complimentary professional development on how to use our technology in the classroom or in a particular lesson.
- We host free subject-specific webinars to demonstrate engaging ways to use our technology.
- We offer more than 1,000 educator-tested, ready-to-use experiments that bring science to life for students.

Recovering from the pandemic is everyone's job. Ensuring we have a STEM-literate society to tackle the challenges of today and tomorrow is our goal—and partnering with educators and communities to build a STEM-literate society is our guiding principle. To emphasize this commitment, in 2022, we changed our name to Vernier Science Education.

Although our name is different, our dedication to hands-on science learning, our deep commitment to being an authentic and trusted partner to educators,

and our support for all aspects of STEM education remain the same. In addition, we remain dedicated to developing new and better ways to engage all students—regardless of whether they want to pursue a STEM career.

To that end, we are continuously developing data-collection devices based on educators' feedback and needs. We are also strengthening our Vernier Graphical Analysis™ Pro software to help students make critical connections between abstract scientific ideas and the natural world.

We appreciate your ongoing support, and we are grateful for everything you do. If you have any questions or need ideas for how to use our products, please contact us. We are here to help!

Thank you for continuing to inspire us—and partnering with us to create the next generation of STEM-literate citizens.

Why Vernier? Endless Possibilities.

Our durable hardware and quality software are designed and priced for hands-on student use whether learning remotely or in the laboratory. We have ready-to-go experiments and resources in a wide variety of subjects.

BIOLOGY • CHEMISTRY • PHYSICS • ENGINEERING
AGRICULTURAL SCIENCE • ENVIRONMENTAL SCIENCE • PHYSIOLOGY

Our sensors and data-collection technology are so versatile that you can use them in nearly any science or engineering course.

Go Direct Spectrometers

Save time and space with our suite of Go Direct® spectrometers. These innovative, easy-to-use instruments have a small footprint and collect data in seconds. Our spectrometers also offer a robust set of capabilities, including

- Full spectrum analysis of samples in seconds
- Beer's law analysis (e.g., absorbance vs. concentration)
- Kinetics experiments (e.g., absorbance vs. time)
- Various modes of data collection (e.g., absorbance, %transmittance, fluorescence, and emissions)

Data can be collected and analyzed using Vernier Spectral Analysis® or LabQuest® App, which offer various analysis features, such as curve fitting and data interpolation. Plus, our free Vernier Spectral Analysis app works with a wide variety of devices via Bluetooth® wireless technology or USB.

“ Students don’t learn effectively by just sitting and listening—they need to be consistently engaged in what they are learning about. As educators, we are always looking for ways to optimize the learning experience for our students, especially in today’s increasingly remote environment.

Why Vernier?

When you teach with Vernier, you're teaching with a complete chemistry solution. From titrations to spectroscopy, our sensors and instrumentation are backed by powerful analytical software, university-level experiments, and unparalleled support.

Quality

Durable hardware for lab and field use

Affordable

Designed for education and education budgets

Versatile

Supports a variety of devices and experiments

The use of these technologies helps to build students' proficiency using instrumentation while providing them with hands-on experience that will better prepare them for careers in the chemistry field.

Go Direct Mini GC

With the easy-to-use Go Direct Mini GC™ and the free Vernier Instrumental Analysis app, students can separate, analyze, and identify substances contained in a volatile liquid or gaseous sample. This portable gas chromatograph detects polar and nonpolar compounds allowing for a wide range of experiments. Sample experiments include fractional distillation and Fischer esterification.

Organic Chemistry with Vernier

Organic Chemistry with Vernier contains 26 experiments that represent a broad range of topics and techniques taught in most university organic chemistry lab courses. The experiments in this book build upon prior knowledge, laboratory techniques, and skills that students learn in general chemistry courses.

Physics

Why Vernier?

Vernier started when one educator, Dave Vernier, decided to build solutions to bring physics to life for his students. Today, our complete physics solution is still powered by the desire to inspire students and foster learning and is backed by powerful software and unparalleled support.

Quality

Durable hardware lasts for years of use

Affordable

Designed for education and education budgets

Versatile

Supports a variety of devices and experiments

I find your extensive suite of hardware—and your innovative software—extremely helpful in my teaching. Couldn't do it without your stuff!

Dynamics Cart and Track System with Go Direct Sensor Cart

GDX

The Dynamics Cart and Track System with Go Direct Sensor Cart includes essential laboratory equipment for teaching dynamics and kinematics. With our Go Direct Sensor Cart, students can explore force, position, velocity, and acceleration directly on their device using Bluetooth wireless technology. There are no wires to create drag, and no additional equipment is required! Each cart features built-in sensors that simplify experiment setup and make this system the best choice for studying dynamics and kinematics.

Vernier Video Analysis App

Students can use their smartphones and tablets in the laboratory or out in the field to capture motion. Once the video is inserted into the app, students set the scale and mark points within the video to track the object in motion. Vernier Video Analysis generates accurate, visually rich graphs and a data table that reflects the recorded motion.

Video Analysis is a browser-based app that works on Windows®, macOS®, Android™, ChromeOS™, iOS, and iPadOS®.

Introduction to Engineering

Go Direct Structures & Materials Tester

GDX

Use our Go Direct Structures & Materials Tester to evaluate the strength of model bridges and engineered structures by measuring the applied load. Utilizing both load and displacement sensors, your students can evaluate the properties of materials.

GDX-VSMT

Vernier Variable Load

Use the Vernier Variable Load in conjunction with Go Direct Energy to provide a range of resistive loads for projects such as engineering wind turbines or investigating solar panels. Students can adjust the potentiometer to provide resistances between 6 and 255 Ω to determine the optimal load on a system.

VES-VL vernier.com/ves-vl

Go Direct Energy

GDX

Go Direct Energy measures voltage and current as well as displays power and energy output of scale model wind turbines and solar panels, so students can quantitatively evaluate the effects of their design changes. It connects via Bluetooth wireless technology or USB to your device.

Go Direct CO₂ Gas

Go Direct CO₂ Gas has three channels: CO₂ gas, temperature, and relative humidity.

GDX-CO2

vernier.com/gdx-co2

Go Direct Acceleration

This 3-axis acceleration sensor has two acceleration ranges ($\pm 157 \text{ m/s}^2$ and $\pm 1960 \text{ m/s}^2$) plus an altimeter and a 3-axis gyroscope.

GDX-ACC

Arduino with LabQuest Sensors

LQ

Help students build coding skills and foster creative critical thinking by combining Vernier sensors with Arduino.®

Vernier Coding with Arduino—Analog Sensor Package

The package has everything needed for students to use Vernier sensors with Arduino microcontrollers, including the *Vernier Coding Activities with Arduino: Analog Sensors* e-book at no additional cost.

VCA-AS-PKG vernier.com/vca-as-pkg

SparkFun RedBoard with Cable

This Arduino-compatible board makes it easy to take sensor measurements when used with the Vernier Arduino Interface Shield.

ARD-RED vernier.com/ard-red

Vernier Arduino Interface Shield

Conveniently connect the SparkFun® RedBoard or Arduino Uno to Vernier LabQuest® sensors with the Vernier Arduino Interface Shield.

BT-ARD vernier.com/bt-ard

Gas Pressure Sensor

Use the Gas Pressure Sensor to monitor pressure changes of a gas.

GPS-BTA vernier.com/gps-bta

Surface Temperature Sensor

Measure temperature where low thermal mass or flexibility is required.

Range: -25 to 125°C

STS-BTA vernier.com/sts-bta

Motion Detector

The Motion Detector uses ultrasound to measure the position of objects.

Range: 0.15 to 6 m

Resolution: 1 mm

MD-BTD vernier.com/md-btd

pH Sensor

This is a general-purpose pH sensor.

Range: pH 0 to 14

Accuracy: ±0.2 pH units

PH-BTA vernier.com/ph-bta

Digital Control Unit

Use the digital output lines of an interface to control DC electrical devices.

DCU-BTD vernier.com/dcu-btd

Anemometer

This is an impeller-type anemometer for measuring wind speed.

Range: 0.5 to 30 m/s (1 to 67 mph)

Sensors and Coding

Students gain a deeper understanding of coding when they see their code interact with sensor data. Our coding solutions give students valuable experience using popular programming languages to affect things beyond the screen.

LabVIEW

Use our free activity book to introduce NI LabVIEW™ programming with Vernier sensors in your classroom.

vernier.com/ni-labview

National Instruments LabVIEW and Vernier

Introduce your students to NI LabVIEW software, a programming language used throughout the engineering disciplines. We have sample LabVIEW programs (VIs) for LabQuest Mini, myDAQ, Go Direct® sensors, and other Vernier hardware.

With LabQuest Sensors

LQ

myDAQ Adapter

The myDAQ Adapter can be used to perform data acquisition with more than 75 Vernier LabQuest sensors and the NI myDAQ interface (sold separately). It is designed for use with NI LabVIEW software.

BT-MDAQ

vernier.com/bt-mdaq

Analog Protoboard Adapter

Use these adapters to connect Vernier LabQuest sensors to a non-Vernier interface, such as NI ELVIS. The connector fits into a standard prototyping board.

BTA-ELV

Vernier Science Education and the Environment

A strong commitment to the environment is central to our mission.

Here are just a few examples of our practices

- **Solar panels**—We have installed over 37,000 watts of solar panels.
- **Alternative transportation**—All employees are provided with free transit passes and are encouraged to walk, bike, carpool, or take public transport to work.
- **Recycling**—We recycle everything we can: paper, plastic, aluminum, cardboard, electronics, batteries, and more.
- **Worm bin composting**—Vernier employees compost food scraps and yard clippings using a colony of red wiggler worms.
- **Electric car charging stations**—Over 10% of Vernier employees own hybrid, plug-in hybrid, or pure electric vehicles.
- **Packing materials**—Employees reuse boxes and packing materials.
- **Lighting**—We've installed energy-saving LED bulbs in our fixtures.
- **LEED-EB Gold rating**—In 2006, and again in 2016, our building qualified for the second highest rating possible from the U.S. Green Building Council.
- **Green Company Award**—We have been named one of the 100 Best Green Companies to Work For in Oregon for twelve years.
- **Printing**—This catalog was produced using 100% wind energy and printed with vegetable-based inks on FSC, SFI and PEFC certified paper stock containing recycled content.

Terms and Conditions

Satisfaction Guarantee

Vernier has been selling science education software and data-collection hardware since 1981. We pride ourselves on the quality and affordability of our products and our service to our customers. If at any time you are unhappy with any of our products or service, please get in touch.

Product Usage

Vernier products are designed for educational use. Our products are not designed nor are they recommended for any industrial, medical, or commercial process, such as life support, patient diagnosis, control of a manufacturing process, or industrial testing of any kind. We design our products with the specifications and features that educators and students need to be successful. In our effort to keep our products affordable and easy to use, we may not meet the specifications or include the features that an industrial scientist or medical professional might want.

Equipment Return

Any product that does not meet your needs may be returned within 30 days for a full refund. Equipment returned after 30 days may be subject to a restocking fee.

A Return Merchandise Authorization, available from Vernier, is required for any product return. Equipment returned for exchange or credit must be in new condition and in its original packaging.

Prices and Shipping

For pricing, import and shipping costs, please contact your local dealer. See dealer information at vernier.com/dealers

International Sales

All Vernier orders for use outside of the US are handled by our export office and a network of dealers around the world. Please email exports@vernier.com to be connected to your local dealer.

Warranties

Most Vernier-branded products carry a five-year limited warranty. Product-specific details can be found under the Support tab on each product's web page. During the warranty period, Vernier will repair or replace the item if there is a defect in materials or workmanship. Outside the warranty, Vernier will attempt to repair most products. The Vernier warranty covers products when used by educational institutions only. Products manufactured by anyone other than Vernier are subject to the conditions of the warranty supplied by the manufacturer.

Additional exclusions and limitations can be found at vernier.com/warranty

Software Licenses

Vernier Graphical Analysis, Vernier Spectral Analysis, and Vernier Instrumental Analysis are available as free downloads from our website or distributed through the appropriate web store. Vernier Graphical Analysis Pro is available as a subscription service. Vernier Video Analysis is available as a subscription service and is distributed as a progressive web app. Video Physics is available for purchase through the App Store. Apps for iOS, iPadOS, Android, and Chrome are distributed through their respective stores. Terms and licensing are thus determined entirely by these stores.

Privacy Policy

Vernier Science Education does not sell, lease, or loan our mailing list or portions thereof to anyone at any time. We do not store credit card information on our online store or in our accounting system. For more information on our privacy policy, see vernier.com/privacy-policy

If you wish to be removed from our mailing list, simply write to us at updates@vernier.com, and we will remove you immediately.
